

JYCAT Spherical PdH Catalyst High Strength And Uniformity platinum catalysis

Our Product Introduction

for more products please visit us on jyalumcatalyst.com

Basic Information

- Place of Origin: china
- Model Number: KMP-100
- Minimum Order Quantity: 1T
- Packaging Details: Customer demand, drum or ton pack
- Supply Ability: 2000T/year

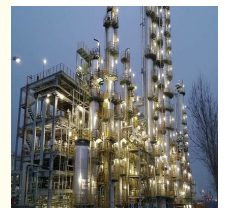

Product Specification

- Highlight: spherical pdh catalyst, uniformity platinum catalysis, pdh catalyst high strength

Product Description

•JYCAT is the only company in China that has developed the technology for producing spherical alumina carrier suitable for the moving bed process by dropping ball method. Notably, this remarkable accomplishment has been awarded an exclusive patent.
The catalyst is used for the production of propane to propylene.
The catalyst has a larger surface area, good hydrothermal stability, high strength and uniformity, and does not crack or wear during use.
Since its production in 2021, this product has achieved seven or eight mature industrial performances, with a usage performance of over 600 tons, and the market has steadily improved.
